Electrolytes (Na,K) (Final)

Sodium

138 136 - 145 mmol/L

Reference values have not been established for patients that are less than 1 year of age.

Pseudohyponatremia may be caused by specimens with high protein or lipid concentrations.

Potassium

4.2 3.4 - 5.0 mmol/L

Reference values have not been established for patients that are less than 1 year of age.

Note: Potassium (K+) reference ranges have been adjusted to accomodate for the possibility of slight leakage of K+ from red blood cells prior to sample separation.
